

THREE STICKS

## DISCOVER DURELL

The pedigree of Three Sticks begins not in the glass, or even in the cellar. It is born in the beautiful and iconic Durell Vineyard, one of Sonoma County's most honored and prized vineyard sites. Planted primarily to chardonnay and pinot noir, the property spans multiple AVA's and is a testament to the diversity and complexity of some of Sonoma County's finest terroir. It is here, Three Sticks was born.

### UNIQUE LOCATION

Durell is located in southern Sonoma county, on the western edge of the town of Sonoma. Spanning more than 750 acres of land, just 160 acres are currently planted to vineyards. The property sits less than 25 miles inland from the Pacific Ocean with the northern most reaches of San Pablo Bay just 10 miles to the south. Both the hills of the Coastal Range and the flats of Sonoma Valley are represented at Durell, their interplay becoming paramount to the vines grown and fruit produced there.

This unique confluence of mountain, bay, ocean, and valley creates terroir ideally suited for world class chardonnay and pinot noir. It's no wonder that for more than four decades Durell has produced award winning wines known for their depth and complexity. Now considered one of America's Gran Cru Vineyards, Durell continues to produce wines of distinction and vast acclaim.

### A WINE HAVEN

The Durell property is rather rare given it has physical and legal placement in three of Sonoma's most notable AVA's. Durell sits wholly in both the Sonoma Coast and Sonoma Valley AVA's, and the northwestern boundary of the Carneros line bisects the property making roughly half of the overall acreage part of this third iconic AVA as well.

The Sonoma Coast appellation stretches the Sonoma County coastline between Marin (to the south) and Mendocino (to the north). It is best defined by coastal influence and rolling hills. While not officially granted until 1981, the Sonoma Valley AVA boasts the historic home of not only the California wine industry, but of California itself. The history and tradition of grape growing and winemaking in this AVA are second to none in the New World. The Carneros AVA is shared with Napa County, but the wind and fog from the San Pablo Bay that mostly define it are prototypical Sonoma and often the physical and meteorological basis for many areas around it.
